

FUN

Watermelon Art Project

For young artist

Overview

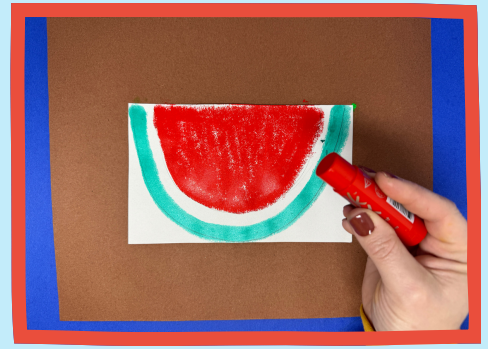

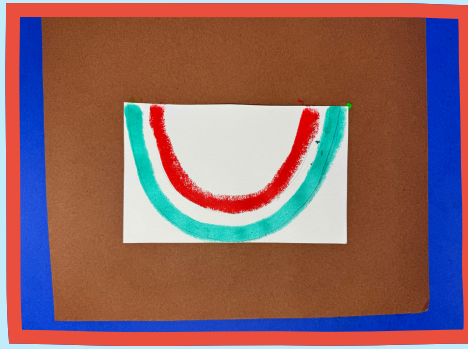

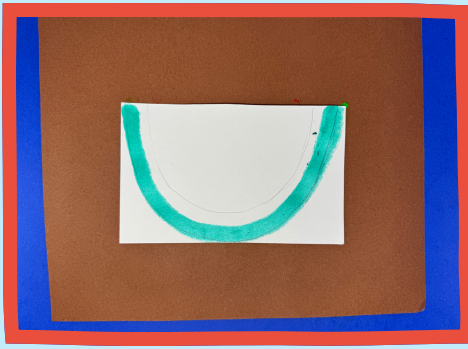

This lesson is a fun way to practice coloring skills. By drawing a curved line and filling in the green and red, students will work on craftsmanship.

Supplies

- 4.5" x 7.5" white paper
- Pencil
- Red paint stick
- Green paint stick
- Black permanent markers
- Black washable marker
- Water dish
- Brush
- Glue Stick
- 3.5" x 10" base paper (table for the watermelon)
- Optional: Printed background on A2R paper

Art to Remember 

Step 1

Adult helpers can draw a 'U' shaped line and allow artists to draw a green line on it. Then a second 'U' shape can be drawn inside the green one. The artists will draw red on that. The artists will then color in the red.

Step 2

Using a black permanent marker, draw black ovals to make seeds.

Step 3

Cut on the outside of the green.

Step 4

Glue a half size rectangle onto the background. Use washable marker to make an oval on the paper. Use water on a brush to make the oval larger.

Step 5

Glue the watermelon shape onto the background paper. It should cover some of the black oval.
